

ARTMAKING AT HOME

MAKE YOUR OWN COLLAGE!

Collage is an interesting art technique in which parts of various pictures are glued to a surface. Collage allows for an interesting combination of unrelated pieces that may surprise us with new meaning.

How to do it?

1. Prepare a stack of old magazines, leaflets and newspapers and look for some interesting backgrounds – for example, a photo of a street, nature or a living room. This will serve as a basis.
2. Select an interesting detail from the pile. For example, start by looking for a human head or a piece of a human body – and add an unrelated motif (such as an animal or a product).
3. Cut or tear out the motifs and stick them on the background. Work carefully.
4. Take a close look at the resulting image, think about it and give it a name. Show it to others and ask what they think about it.
